A FULL RANGE OF PROFESSIONAL AV SERVICES

Government ministries and departments require stable and reliable suppliers that fully understand their special requirements for efficient solutions that meet both their secure and non-secure needs.

Solotech is a single source full-service supplier with over 30 years of experience in supplying and installing professional solutions that fully integrate audio, video, lighting and all other audiovisual technologies.

We work with the best manufacturers of video and audio conferencing technologies. Our service, programming and installation staff are factory certified.

Solotech's teams have provided federal, provincial, territorial and municipal governments and agencies with both special events services and permanent installations services.

Solotech offers custom solutions to meet your specific needs in systems integration for audio, video, projection and displays, video conferencing, audio conferencing, multimedia, distance learning, programming and control, custom cabling solutions.

Solotech is able to provide complete solutions for your boardroom, conference and meeting rooms, training facilities, operations centers and control rooms, auditoriums, museums, exhibit areas, media facilities, and all other areas that require professional state-of-the-art solutions.

Solotech, a well established company with solid financial partnerships, offers stability that allows us the opportunity to become a reliable partner and to be a major contributor to the success of your project.

Solotech is an approved supplier under the Federal Government's AVSO program in Canada.
